Brevard Traffic Incident Management and Community Traffic Safety Team Meeting Minutes

September 24, 2014
9:00 AM – 10:45 AM

LOCATION: Viera Government Complex
Atlantic Room - Bldg. C – 3rd floor
2725 Judge Fran Jamieson Way
Melbourne, FL 3294

Introductions	❖ Sign In - See attached ❖ Introduction of Team Members
CTST Discussions/ Presentations	❖ CTST Issues/Discussion - Sergeant Scott Bearinger updated the team on the I-95 Enforcement. During the month of June, the Sheriff's office worked in conjunction with the Florida Highway Patrol (FHP), and each individual agency on different days of the month on implementing the I-95 Enforcement. Also, in the month of July, they worked in conjunction with all agencies at the same time. Sergeant Bearinger informed the team that in the month of June 2014, the crashes on I-95 were drastically reduced by 30%-40% due to FHP's presence. ❖ Ms. Kim Smith informed the team that Brevard County was added to the top 15 targeted Counties in the State of Florida for pedestrian related injuries. Ms. Smith further explained that just this year alone, Brevard County has already had 11 pedestrian deaths. ❖ Sheryl Bradley reminded the team that the November 2014 CTST team meeting will take place at the Melbourne Police Department. ❖ Mr. Joe Steward reviewed with the team the District 5 Traffic Fatality Report by countries. The full report has been attached, for review. ❖ Ms. Bradley reminded the team that the Biketoberfest will be taking place this October 16th - 19th. Ms. Bradley also informed the team that the CTST website, under the "Resources" tab, has the approved electronic messaging for any agencies that want to include walk to school safety or bike safety messaging for the event. ❖ Please see attached the CTST Safety Advisor Newsletter for September 2014. To learn more about the CTST team, please visit their website at: http://www.communitytrafficsafety.org/
Construction Updates	❖ FDOT - See attached ❖ Brevard County - No update ❖ Cities - No updates
Maintenance Updates	❖ Transfield Services - Routine maintenance ❖ FDOT Brevard Operations - Routine maintenance ❖ DBI - Routine maintenance
Traffic Incident Reviews	❖ 09/07/2014 - I-95 NB at Exit 195: SR 519/Fiske Blvd. (299880) - Crash in Brevard County, going Northbound on I-95 at Exit 195: SR-519/Fiske Blvd with congestion from at MM 193 to at Exit 195: SR-519/Fiske Blvd which involved a vehicle and semi-trailer that resulted in all lanes blocked. The Brevard County Sheriff's Officer was working the crash initially. The Regional Traffic Management Center (RTMC) was unable to locate accident when call first came in due to vehicle being hidden in the woods. There were reported injuries to children. The total roadway clearance time was 02:03:51and the total incident clearance time was 03:02:51.

	❖ 09/13/2014 - I-95 NB at Exit 223: SR 46/Main (301452/301460/301623) - Crash in Brevard County, going Northbound on I-95 at Exit 223: SR-46/Main St which resulted in off-ramp closure and all lanes blocked. Crash involved (3) jack-knifed semi-trailers, one of which burst into flames. It started with reports of a jack-knifed semi-trailer on the exit ramp, which the operators were able to locate on camera. As the operators watched the incident, they saw (2) other semi-trailers jack-knife; catching on fire. There was one fatality per the report. The total roadway clearance time was 10:53:47 and the total incident clearance time was 21:59:24.
TIM Discussions/ Presentations	❖ Brevard County Area Open Roads Policy – Mr. Charles Stratton discussed with the team the Local" Open Roads Policy that was last signed by Brevard County agencies in 2007. Mr. Stratton compared the Local Open Roads Policy against the new State of Florida Open Roads Policy that was revised January 2014 and highlighted the updated information that was found in the new Open Roads Policy. After comparing the two documents it was stated that the Local Open Roads Policy needed to reflect the new information. Additionally, it has been several years since the first agreement was produced and since then, local agencies and first responder staff have changed and the momentum of the agreement has been lost. It was mentioned that a local Memorandum of Understanding (MOU) can be created to include the agreement with the updated information and have local agencies re-sign the agreement. To learn more, please see the attached the Local Open Roads Policy and the State of Florida Opens Road Policy Agreement. ❖ The Traffic Incident Management Operating Guidelines Video was viewed by the team. This video was developed by the Maine - New Hampshire Traffic Incident Management Committee as a training tool for its Traffic Incident Operating Guidelines. The video was funded through Kittery Area Metropolitan Planning Organization (MPO) and the Maine Turnpike Authority. To view the full video, please click on the following link: TIM Operating Guidelines Video
Other	❖ Agency Updates - Brevard Sheriff's Office mentioned their concern with the team in regards to the local schools and parents causing traffic backups by coming to the school's early to pick up their children. The increase of cars are causing a backed up from the school properties and extending out to the local roads. The Florida Highway Patrol (FHP) informed the team of a couple of safety initiative campaigns that their agency will be holding in the near future. The first campaign is called "Arrive Alive on I-95" that will take place over the Columbus Day weekend. FHP, along with other area law enforcement agencies, will be taking part in the Arrive Alive initiative and will be cracking down on aggressive drivers, speeding, driving while intoxicated, reckless driving, unsafe movements (such as following too closely) and any other aggressive driving behavior that make roadways unsafe. The next campaign is called "Driving Toward Zero" and also takes place this month, targeting highway fatalities. ❖ Open Forum - There was a concern from the team in regards to communication when asset damage occurs during incidents. It was stated that there has been asset damage recently and the proper agency has not been contacted in a timely manner to report the damage. Additionally, when the incidents are occurring and there is guard rail damage, it is not included on the incident report, which results in the proper party not be held responsible. It was stated that the incident reports need to include the appropriate information on the reports to properly assess the damage. ❖ Charles Stratton informed the team that as part of the Florida Department of Transportation and the TIM team's commitment to improve the safety of our responders by providing training and education, the Strategic

Highway Research Program (SHRP-2) training for first responders will be provided to the District 5 TIM teams in the upcoming year. The Strategic Highway Research Program (SHRP-2) has developed a program *BY RESPONDERS - FOR RESPONDERS*, with the objective that nationally, responders acquire a common set of core competencies that promote a shared understanding of the requirements for achieving the safety of responders and motorists, quick response, and effective communications at traffic incident scenes. Further information will be provided to the team when the training has been scheduled.

- Next CTST meeting will be held October 15, 2014
- Next combined meeting will be held November 26, 2014

Central Florida's

"BREVARD COUNTY AREA OPEN ROADS POLICY"

Quick Clearance for Safety and Mobility

This agreement by and between the Florida Highway Patrol (FHP), the Florida Department of Transportation (FDOT), Local Law Enforcement and Local Fire Rescue, establishes a policy for the FHP, FDOT, Local Law Enforcement and Local Fire Rescue personnel to expedite the removal of vehicles, cargo, and debris from roadways on the State Highway System to restore, in an URGENT MANNER the safe and orderly flow of traffic following a motor vehicle crash or incident on Florida's roadways.

Whereas: Public safety is the highest priority and must be maintained especially when injuries or hazardous materials are involved. The quality of life in the State of Florida is heavily dependent upon the free movement of people, vehicles, and commerce. The FHP, FDOT, city and county officials of Local Law Enforcement and Local Fire Rescue share the responsibility for achieving and maintaining the degree of order necessary to make this free movement possible. Agencies have the responsibility to do whatever is reasonable to reduce the risk to responders, secondary crashes, and delays associated with incidents, crashes, roadway maintenance, construction, and enforcement activities.

The following operating standards are based on the philosophy that the State Highway System will not be closed or restricted any longer than is absolutely necessary.

Be it resolved: Roadways will be cleared of damaged vehicles, spilled cargo, and debris as soon as it is safe to do so. It is understood that damage to vehicles or cargo may occur as a result of clearing the roadway on an urgent basis. While reasonable attempts to avoid such damage shall be taken, the highest priority is restoring traffic to normal conditions. Incident caused congestion has an enormous cost to society. This cost is significantly greater than the salvage value of an already damaged vehicle and its cargo.

Florida Highway Patrol Responsibilities

Members of the FHP who respond to the scene of traffic incidents will make clearing the travel portion of the roadway a high priority. When an investigation is required, it will be conducted in as expedient a manner as possible considering the severity of the collision. Non-critical portions of the investigation may be delayed until lighter traffic conditions allow completion of those tasks. The FHP will only close those lanes absolutely necessary to conduct the investigation safely. FHP will coordinate with FDOT representatives to set up appropriate traffic control, establish alternate routes, expedite the safe movement of traffic trapped at the scene, and restore the roadway to normal as soon as possible.

Whenever practical, crashes on access controlled roadways will be removed to off ramps, accident investigation sites or other safe areas for completion of investigations to reduce the delays associated with motorists slowing to "gawk". Tow trucks will be requested as soon as it is evident that they will be needed to clear the roadway. FHP will assure that all authorized tow operators have met established competency levels and that the equipment is of appropriate size, capacity and design meeting the standards for the State of Florida.

The FHP will not unnecessarily cause the delay in reopening all or part of a roadway to allow a company to dispatch their own equipment to off-load cargo or recover a vehicle or load that is impacting traffic during peak traffic hours or creating a hazard to the public. The FHP and FDOT will cooperate in planning and implementing clearance operations in the most safe and expeditious manner.

Florida Department of Transportations Responsibilities

When requested by the FHP or other emergency agency, FDOT will respond and deploy resources to major traffic incidents 24 hours a day, 7 days per week. Each FDOT District will develop and implement response procedures to meet the goal of providing initial traffic control within **30 minutes** of notification during normal working hours and **60 minutes** after hours and on weekends.

The FDOT, in coordination with the FHP, will upgrade traffic controls, determine detour routes, and discuss clearance strategies. When requested FDOT will provide temporary traffic controls to ensure a safe workzone for all responders and the motoring public.

The FDOT in cooperation with the FHP will determine and deploy the necessary heavy equipment and manpower to reopen the roadway if clearance of the travel lanes are being delayed or is determined that the task is beyond the capabilities of the wrecker service on scene. If cargo or spilled loads [non-hazardous] are involved, FDOT will make every effort to assist in the relocation of the materials in the shortest possible time, using whatever equipment necessary. All such materials or any vehicles relocated by FDOT will be moved as short a distance as possible to eliminate the traffic hazard.

FDOT personnel will document all hours and equipment used for traffic control; roadway clearance and debris clean up. FDOT will place traffic control devices at the scene should any damaged vehicles or cargo remain adjacent to the travel lanes on the shoulder for removal at a later time.

The FHP and FDOT will continually work together to ensure that the needs of motorists on our highways are being met in the most professional, safe and efficient manner.

Local Law Enforcement Department's Responsibilities

Members of Local Law Enforcement who respond to the scene of traffic incidents when applicable will make clearing the travel portion of the roadway a high priority. When an investigation is required, it will be conducted in as expedient a manner as possible considering the severity of the collision. Non-critical portions of the investigation may be delayed until lighter traffic conditions allow completion of those tasks. The Local Law Enforcement will close only those lanes absolutely necessary to safely conduct the investigation. The Local Law Enforcement will coordinate with FDOT representatives to set up appropriate traffic control, establish alternate routes, expedite the safe movement of traffic trapped at the scene, and restore the roadway to normal conditions as soon as possible.

Whenever applicable, damaged vehicles on access controlled roadways will be removed to off ramps, accident investigation sites, or other safe areas for completion of investigations to reduce the delays associated with motorists slowing to "gawk." Tow trucks will be requested as soon as it is evident that they will be needed to clear the roadway. The Local Law Enforcement will assure that all authorized tow operators have met established competency levels and that the equipment is of appropriate size, capacity, and design to meet all standards of the State of Florida.

The Local Law Enforcement will not unnecessarily cause any delay in reopening all or part of a roadway to allow a company to dispatch its own equipment to off-load cargo or recover a vehicle or load that is impacting traffic during peak traffic hours or creating a hazard to the public. The Local Law Enforcement and FDOT will cooperate in planning and implementing clearance operations in the most safe and expeditious manner.

Local Fire Department's Responsibilities

Members of Local Fire Departments who respond to the scene of traffic incidents will make clearing the travel portion of the roadway a high priority. When working an incident (where there is no injuries or hazardous materials) operations will be conducted in as expedient a manner as possible considering the severity of the collision. The Local Fire Departments will close only those lanes absolutely necessary to safely conduct the fire/rescue operations. The Local Fire Departments will coordinate with FDOT representatives to set up appropriate traffic control, establish alternate routes, expedite the safe movement of traffic trapped at the scene, and restore the roadway to normal conditions as soon as possible. As soon as FDOT has set up appropriate traffic control for the safety of the responders and travelers, Local Fire Departments will move any fire apparatus or vehicles initially used to shield responders to appropriate areas.

Therefore, it is agreed as follows:

The FHP, FDOT, city and county officials of Local Law Enforcement and Local Fire Rescue, will evaluate and continually update and modify their operating policies, procedures, rules, and standards to assure they are consistent with this **"OPEN ROADS POLICY"** agreement.

The FHP, FDOT, city and county officials of Local Law Enforcement and Local Fire Rescue, will research and evaluate and conduct training in the most advanced technologies, equipment, and approved methods for the documentation and investigation of crash or incident scenes. FHP and Local Law Enforcement will prioritize the investigative tasks and reopen travel lanes upon completion of tasks that must be conducted, without the impediment of traffic flowing.

Roadways will be cleared as soon as possible. It is the goal of all agencies that **all incidents be cleared from the roadway within 90 minutes of the arrival of the first responding officer.** This goal being made with the understanding that more complex scenarios may require additional time for complete clearance.

It is further agreed that:

The city, FHP, FDOT, and county officials of Local Law Enforcement and Local Fire Rescue, will actively solicit and enlist other state, county, and local agencies, political subdivisions, industry groups, and professional associations to endorse and become party to this **"OPEN ROADS PHILOSOPHY"** for the State of Florida.

Agreement Execution: Use of Counterpart Signature Pages

This Agreement, and any amendments hereto may be simultaneously executed in multiple counterparts, each of which so executed shall be deemed to be an original, and such counterparts together shall constitute one and the same instrument. Notwithstanding any other provision herein to the contrary, this Agreement shall constitute an agreement amongst the parties that have executed a counterpart and parties listed but not executing shall not be deemed to be parties to the Agreement.

In witness whereof, each party hereto has caused this document to be executed in its name and on its behalf by it's duly authorized Chief Executive.
